
OUTLINE—DISCUSSION OF DRAFT PROPOSED RULE TO IMPLEMENT 2008 8-HOUR OZONE NAAQS**CAVEATS**

- This is my current thinking of what EPA will propose.
 - It has not been through EPA management review.
 - The new administration will be reviewing all pending rulemaking and may very well ask for revisions of any or all parts of this.
-

BIG PICTURE ISSUES

- A. How will EPA implement the transition from the 1997 8-hour standard to the 2008 8-hour standard in a way to ensure continued momentum in states' efforts toward cleaner air?
- Should EPA revoke the 1997 8-hour ozone standard?
 - What obligations under the 0.08 ppm 8-hour ozone NAAQS should continue to apply as an area begins to implement the 0.075 ppm 8-hour ozone NAAQS and what obligations should no longer apply?
 - Does the requirement for continued implementation of the obligations for the 1997 8-hour ozone standard expire at some point?
- B. How will EPA classify nonattainment areas for the 2008 8-hour standard? What attainment dates would apply?
- For the 0.075 ppm 8-hour ozone standard, should EPA classify any areas under subpart 1 of part D, title I of the Clean Air Act?
 - Should EPA consider adjusting the classification table for subpart 2 areas under the 0.075 ppm standard in a manner different from the adjustment made for the 1997 0.08 ppm 8-hour ozone standard?

OTHER ISSUES

- C. How will EPA address requirements for modeling and attainment demonstration SIPs when implementing the 8-hour ozone standard?
- D. What requirements for RFP should apply under the 2008 8-hour ozone standard?
- E. What requirements should apply for RACM and RACT for 0.075 ppm 8-hour ozone nonattainment areas?
- F. What Aspects of Transportation Conformity and the 2008 Ozone Standard Are Addressed in this Proposal?
- G. What requirements for General Conformity should apply to the 2008 8-hour ozone standard?
- H. How Should the NSR Program be Implemented Under the 0.075 ppm 8-Hour Ozone NAAQS?
- I. What emission inventory and emission statement requirements should apply under the 2008 8-hour ozone NAAQS?
- J. What ambient monitoring requirements will apply under the 2008 8-hour ozone NAAQS?
- K. How will EPA treat attainment dates for the 2008 8-hour ozone standard?
- L. What is the required timeframe for obtaining emissions reductions to ensure attainment by the attainment date?
- M. How will EPA address long-range transport of ground-level ozone and its precursors when implementing the 8-hour ozone standard?

- N. How will EPA address transport of ground-level ozone and its precursors for rural nonattainment areas, multi-state nonattainment areas, areas affected by intrastate transport, and international transport?
1. Rural transport nonattainment areas
 2. Multi-state nonattainment areas
 3. International transport
- O. Are contingency measures required in the event of failure to meet a milestone or attain the 2008 8-hour ozone NAAQS?
- P. How will the section 182(f) NO_x provisions be handled under the 0.075 ppm 8-hour ozone standard?
- Q. Will states be allowed to take a multipollutant approach when developing their .075 ppm 8-hour State Implementation Plans?
- R. What guidance should be provided that is specific to Tribes?
- S. What are the requirements for Ozone Transport Regions (OTRs) under the 2008 8-hour ozone standard?
- T. Is EPA proposing any additional requirements related to enforcement and compliance?
- U. What requirements should apply to emergency episodes?
- V. Will EPA's "Clean Data Policy" continue to apply under the 0.075 ppm 8-hour standard?
- W. Will EPA encourage flexible programs?

WHAT DOES THIS RULEMAKING NOT ADDRESS?
