Questions & Answers

Q: There is a student manual available for the 2009 version of the Introduction to Hazardous Air Pollutants course (APTI 400) available on the APTI-learn website. Does your organization also have the PowerPoint slides for this course or have access to the slides through APTI? Or would we have to start over from scratch?

A: EPA has materials available for instructors for both Introduction to Hazardous Air Pollutants (APTI 400) and Inspection and Safety Procedures (APTI 446) available. The type of materials available varies depending on the course.

   o APTI 400 – Version 2009 – Instructor PowerPoint Slides
   o APTI 446 – Version 1994 – Instructor Manual, pre- and post-tests, and Instructor PowerPoint slides

If you would like a copy of the Instructor Materials, please contact Alice Lutrey at alutrey@marama.org indicating your contact information and which materials you wish to receive.
